**FACULTY OF ENGINEERING**

**DEPARTMENT OF ARCHITECTURE**

**MASTER OF SCIENCE PROGRAMME**

**"Reuse of Buildings and Complexes"**

# CALL FOR APPLICATIONS

**Academic Year 2026–2027**

The Department of Architecture of the University of Thessaly invites applications for admission to the Master's Degree Programme (MSc) **"Reuse of Buildings and Complexes"** for the Academic Year **2026–2027**.

The programme leads to the award of a **Master of Science (MSc)** in **Reuse of Buildings and Complexes**.

To obtain the MSc degree, students are required to successfully complete coursework, workshops, and seminars over two academic semesters, followed by the preparation and successful defense of a Master's Thesis.

The programme has a duration of **three academic semesters** (90 ECTS credits, full-time study), with the possibility of extending the studies by **one additional academic semester**. Students may also apply for a **temporary suspension of studies** for up to **two academic semesters** for serious professional, family, personal, or health reasons.

The tuition fee for the programme is **€2,500**.

A maximum of **twenty (20)** students will be admitted. This number may be exceeded in cases of applicants with equal ranking or in other exceptional cases, subject to the decision of the competent academic bodies. Members of the categories **EEP, EDIP, and ETEP** may also be admitted as additional students in accordance with Article 34, paragraph 8, of Greek Law 4485/2017.

The programme is delivered through a **flexible blended-learning format**, consisting of:

- **70% distance learning**
- **30% face-to-face instruction**

**Eligible Applicants**

Applications are invited from graduates of Greek Higher Education Institutions (HEIs) or equivalent foreign universities whose undergraduate studies are directly related to the academic fields covered by the programme.

Indicative eligible degrees include graduates from:

- Departments of Architecture
- Departments of Spatial Planning and Regional Development
- Departments of Civil Engineering
- Former Technological Educational Institutes (TEIs) in Structural Engineering, Monument Restoration, and Interior Architecture

Graduates from other university departments may also apply provided they possess either:

- postgraduate studies in a related field, or
- documented professional experience relevant to the programme.

International applicants, both from **EU and non-EU countries**, are welcome to apply.

The language of instruction is **Greek**. In the event that international students are admitted, all courses will also be offered in **English**.

**Application Procedure**

Applicants should complete the application form and submit it electronically to:

reuse-master@uth.gr , **epanaxriseis@gmail.com**

To complete the application, candidates must submit the following documents electronically to the Secretariat of the MSc Programme:

1. Completed application form
2. Curriculum Vitae (CV)
3. Certified copies of degree certificates or certificate of completion of studies
4. Publications in peer-reviewed journals (if applicable)
5. Evidence of professional and/or research experience (if applicable)
6. Copy of both sides of the national identity card or passport
7. Two letters of recommendation
8. Proof of English language proficiency at **B2 level** or higher. International applicants must demonstrate adequate command of English.
9. Signed declaration confirming the accuracy and authenticity of the submitted information.

**Application Deadline 21 September 2026**

**Selection Procedure**

The selection of applicants is carried out by the Admissions Committee of the MSc Programme **"Reuse of Buildings and Complexes"** in two stages:

- **Stage 1:** Evaluation of the application file and supporting documents.
- **Stage 2:** Candidates who successfully pass the first stage will be invited for an interview.
